## Sparkling Wine

Sparkling wine has long been associated with "celebration" and rightly so! From crisp and dry to the kiss of sweetness from a sparkling Moscato d'Asti, sparkling wine always has a festive feel. Though we tend to think about sparkling wine as just a special occasion drink, it works perfectly as an aperitif and is one of the most flexible and versatile wines to pair with your meal.

## WHITE WINES

### Chardonnay

Like many wines, Chardonnay can have variations in flavor depending on where the grapes were grown. Generally speaking, Chardonnay is a dry, medium- to full-bodied wine with moderate acidity and alcohol. Its flavors range from apple and lemon to papaya and pineapple, and it also shows notes of vanilla when it's aged with oak. In Chablis and Burgundy, the minerality of the grape shines through while in the New World areas like California, the styles are more full bodied, usually with pronounced oak and sweeter fruit flavors.

Riesling is an aromatic grape variety displaying flowery, almost perfumed, aromas as well as high acidity. This aromatic wine offers primary fruit aromas of orchard fruits like nectarine, apricot, honey-crisp apple, and pear. Besides fruit, you'll often smell things like honeycomb, jasmine, or lime peel, along with a striking aroma that smells similar to petrol or petroleum wax.

## Red Wines

### Pinot Noir

With this lighter style of red, Pinot Noir, red fruits are the star of the show, most often strawberry, tart cherry and raspberries. Pinot Noirs from Burgundy, the ancestral home of this grape, tend to be more earth driven than their New World counterparts. This picky grape loves warm days with cold nights, making Oregon and cooler parts of California, like Sonoma Coast, ideal locations for growing Pinot Noir in the US. Wines from Oregon have a bit more structure and express "cooler" fruits while the California-made Pinot Noirs come from warmer climates, yielding riper fruits which gives the wine a more velvety feel, expressing softer fruit and vanilla from being gently oaked.

*Did you know that barley is an essential ingredient in bourbon production? Barley has enzymes that break down the starch into sugars in corn before the fermentation process. Here, yeast is added to turn these sugars into alcohol. The result is alcohol, congeners (esters, acids, and aldehydes), and CO2. The resulting mash is called distiller's beer.*

*Fun Fact: What's Bottled in Bond (BIB)? Signed in 1897, by Preseident Grover Cleveland, the government became the guarantor of distilled whiskey. For a 'bonded' whiskey, it must be made at one distillery, in one season, bottled at 100 proof, and aged at least 4 years in a givernment-bonded warehouse.*

*So why's are Angel's envious? The Angel's Share is the alcohol that evaporates over time, which occurs more when placed in warmer and drier climates. These 'alcoholic vapors' rise to the heavens; thus, to the angels; however, that's all they get. And so, they're envious to have more.*
