

Virtual and Hybrid Meetings

Partnered with PSAV and powered by Cisco Wireless Meraki Systems, InterContinental San Francisco is pleased to bring Virtual or Hybrid technology services to your next event. We know having a specialized team is critical to the success of your program and meeting your program's objectives. The On-Site Virtual Events team at PSAV can help the show go on even if a key presenter or some of the attendees are unable to attend due to travel restrictions, space limitations, remote office locations or to meet today's distributed workforce.

WHY INTERCONTINENTAL SAN FRANCISCO?

- ◆ Onsite network management offers real time analytics such as bandwidth usage and most used apps.
 - ◆ Meeting floors heat-mapped for consistent and even connectivity monitored in real time.
- ◆ Dedicated APC Symetra 40kW UPS system ensures reliable, clean power for all wired or wireless traffic.
 - ◆ 250 Mbps dedicated specifically to meeting space floors, expandable upon request.
 - ◆ Hotel offers a primary circuit of 750 Mbps with a seamless failover from fiber to microwave.
 - ◆ Modern building offers a built-in fiber backbone for connectivity to Moscone Center, allowing HD video broadcast and SSID retention between buildings.
 - ◆ Custom passwords for all dedicated bandwidth requests.
 - ◆ State-of-the-Art and Customizable Ketra/Lutron lighting accents in Ballroom.

From Audio Conferences to interactive Webinars, PSAV offers an array of virtual and hybrid services as shown below. Allow their knowledgeable team of experts to design a package to meet your budget. Click on any of the photos to be directed to PSAV's Virtual Events Site Guide:

Video Conferencing

These are hardware and software solutions for real-time 2-way video and audio conferences with multiple participants. You are able to connect conferencing hardware to computers and mobile devices. Presenters who are unable to attend in person can connect from their home or office without expensive video conferencing hardware.

Webcasting and Recording

This is a singular device that records livestreams and overflows. This solution offers a 1-way live broadcast to viewers anywhere in the world who are watching on an internet connected device. It has the ability to create different layouts and looks for an online event.

Chime Live

Chime Live combines industry-leading video streaming solutions with Concise Group's award-winning Chime attendee engagement platform for engaging, transformative and insightful meetings. Contact PSAV for more information.
