

LOCATION

Located an hour north of Cabo San Lucas, near the artist's haven of Todos Santos on Mexico's Pacific coast, Rancho Pescadero is the perfect sanctuary for those seeking nature's splendor. From the Sierra Laguna mountains to pristine beaches, the wonder of nature thrives.

OVERVIEW

Rancho Pescadero provides a luxurious escape to connect. Connect with your surroundings, connect with your partner and most of all, connect with yourself. We are an adults only resort with a relaxed vibe, all complimented by wellness and our sustainable mission. Combined with the ocean air, culinary decadence and genuine service, you will leave looking forward to your next visit.

Discover a sense of authenticity honoring the innate beauty and materiality of Baja. The Rancho Pescadero experience brings about the natural abundance of our desert gardens and the Baja coast. Embrace the joy of living well.

ACCOMMODATIONS

Rancho Pescadero rooms and villas are designed to provide a relaxing respite to enjoy both indoors and outdoors. These beautifully appointed rooms are stunningly set for spectacular views of the Sierra de la Laguna Mountains or Pacific Ocean. Each of our oceanfront villas has a fire pit, private plunge pool, and outdoor shower.

EVENTS

We host indoor events up to 200 people, and indoor/outdoor events up to 500. Event lawn, patios, poolside, beach and restaurants provide a stunning backdrop to your special occasion. Our menus are made from the freshest organic ingredients from our own gardens and farm. Fresh seafood daily and the best tropical fruits will leave you wanting more.

WE ARE EARTH FRIENDLY

We have designed our resort to ensure the preservation of Pescadero and Baja California Sur.

- ◆ We are carefully transplanting thousands of plants moved during construction and have begun placing them back in their original locations.
- ◆ We have taken steps to ensure the dunes are undisturbed.
- ◆ We will continue to use dark sky lighting.
- ◆ We are installing a desalination plant providing water for human use. Filtered grey water is used for our landscaping and well water for farm irrigation.
- ◆ We will continue to maintain and use our own water treatment plant.
- ◆ We are adding a solar farm to support the additional electrical needs with a plan to be completely sustainable with solar power in 2-3 years.
- ◆ We are leading the effort on the new composting program for the Todos Santos/Pescadero community.
- ◆ We do not use single use plastics and will continue to recycle/compost, striving to become a zero-waste property.
- ◆ We have begun a program manufacturing organic bamboo straws for the local businesses as part of our non-profit organization. This organization will provide additional sustainability and educational services to the local Pescadero area.
- ◆ Working with local sanitation provider to ensure waste is disposed of properly.
