ASPARAGUS

There is risk associated with consuming raw and under-cooked fish, oyster, meat or poultry products (medium, medium-rare, rare, or extra-rare). If you have chronic ill-ness of the liver, stomach, or have immune disorders, you are at greater risk of serious illness from fish, meat, or poultry and should eat them fully cooked. Some of these conditions have no symptoms, so you may not know you are at risk. Particularly vulnerable young children, pregnant women, or older adults, sufferers of liver disease or alcoholism and those with compromised immune systems. We recommend that these people eat only fully cooked food to insure personal safety. The Seagate Beach Club buys the best possible products from licensed, qualified purveyors and continually strives to safeguard the health and safety of our Members and Guests.

A 20% SERVICE CHARGE AND APPLICABLE TAXES WILL BE ADDED TO THE CHECK.
