Design

With architecture and interiors by AW², Reda Amalou & Stéphanie Ledoux, Silversands Grenada offers a striking and minimalist design that brings the surrounding landscape into focus. The resort’s aesthetic blends authenticity, nature, luxury, and modernity in a stunning display of clean lines against the rippling sands of Grand Anse beach and its attendant wild beauty. The resort’s architecture defines the identity of the resort. The layout is primarily organized to showcase the stunning sea views, while ensuring the utmost degree of privacy and simultaneously providing unique spaces for relaxing, celebrating and mingling. The exterior spaces echo the architecture’s modern lines through gardens, courtyards and water features. Terraces, day bed areas and pools are all designed to blend seamlessly with the architecture itself. The resulting setting lulls guests down to the rhythm of the island in a sea of bright whites, natural teak and neutral tones. The view lines and spaces are all arranged to make the location and surroundings the star.
