

## HOLLYWOOD WAX MUSEUM

While Branson visitors may arrive wanting to see fabulous shows featuring world-class performers onstage, they probably don't expect to get up close and personal with the likes of departed stars of the screen such as Charlie Chaplin, John Wayne and Michael Jackson and even current celebrities like Johnny Depp, Simon Cowell and Lady Gaga. At Hollywood Wax Museum, that's exactly what they discover. With 15,000 sq. ft. of iconic movie scene displays and actors from every decade, you can get up close with your favorite stars. But the fun begins even before you enter the building!

One of the most photographed Branson attractions— located right in the heart of the Entertainment District on Hwy. 76 — features its very own version of Mt. Rushmore, "Mt. Hollywood," includes sculpted faces of Hollywood greats John Wayne, Marilyn Monroe, Charlie Chaplin and the King himself, Elvis Presley. On the roof of the building is a New York City skyline being attacked by the largest primate in the Midwest. With these iconic displays, it's easy to spot the Hollywood Wax Museum.

## CHATEAU ON THE LAKE RESORT

Looking for a beautiful location for a romantic getaway? What better choice than a visit to Branson in the Ozark Mountains of Missouri. Take advantage of an enticing package offered by the AAA Four-Diamond Chateau on the Lake Resort & Spa, on scenic Table Rock Lake. Throughout February, the resort is offering several packages perfect for a romantic getaway: "Let Me Call You Sweetheart Valentine's Package," "Romantic Rendezvous Package," and "Romantic Revival for 2 Package." In addition, you have the option of adding one of these unique Titanic Museum Attraction enhancements to any of the packages: "Captain's Vow Renewal Package" or the "1st Class Vow Renewal Package." Surprise your sweetheart with a romantic getaway to Branson.

## THE SKYSCRAPER

The newest thrill ride in Branson is opening very soon! Located at The Track Family Fun Park #3, riders of the all-new Skyscraper will experience the force of four G's, just like what a test pilot feels flying a fighter jet. The Skyscraper's base tower stands 80-feet-tall, and the windmill-style propeller arms extend to 160-feet-tall at their maximum height. The propeller arms spin at a maximum speed of 60 mph, producing the G-force effect. Get your thrills at The Track Family Fun Park on Hwy. 76!
